SUMMARY

A highly driven and results-oriented Software Engineering student with robust experience in full-stack development. Proven expertise in translating innovative concepts into scalable and high-performance applications. Demonstrated proficiency through an internship at Instatus.com, where I contributed to both front-end and back-end development, as well as through academic projects utilizing modern technologies such as Node.js, React, and MongoDB. Recognized for strong analytical problem-solving abilities, effective leadership, and a collaborative approach to teamwork.

EDUCATION

Bachelor of Computer Science,
Major in Software Engineering
German International University, Cairo
October 2021 – July 2025

LANGUAGES

English: *Professional Proficiency*
Arabic: *Native Proficiency*
Deutsch: *Limited Working Proficiency*

BACHELOR THESIS

USING EXPLAINABLE AI ALGORITHMS FOR MATERIAL RECOGNITION

- Developed an XAI approach for material recognition by leveraging transformer models (**ChemBERTa**) to generate interpretable predictions.
- Built a dynamic dashboard using **Next.js** to enable chemists to evaluate and analyze model outputs in real time.
- Integrated **Flask APIs** to seamlessly serve the transformer model, ensuring efficient and scalable performance.
- Enhanced model transparency and reliability, contributing to improved decision-making in materials science.
- Deployed model infrastructure using **AWS SageMaker**, **EC2**, **CloudFormation**, and **S3 Buckets**, ensuring scalability, robustness, and efficient cloud resource management.

CERTIFICATIONS

Oracle Cloud Infrastructure 2025 Certified Foundations Associate *Oracle* Issued March 2025 – Expires March 22, 2027 Oracle Certification Verification Link

SKILLS

- Node.js
- React
- SQL
- Git
- HTML & CSS
- UI/UX Knowledge
- TypeScript
- MongoDB
- Tailwind CSS
- AWS Services
- Oracle Cloud
- Deep Learning
- GraphQL
- Prisma
- Next.js
- NestJS
- ASP.NET
- Angular
- JavaScript
- Python
- Java
- Docker
- RESTful APIs
- Agile Methodologies
- CI/CD Pipelines
- Jest (Testing)
- Kubernetes
- Microservices
- Clean Architecture
- Drizzle ORM
- PostgresSQL
- Linux
- Redis
- JWT Authentication
- ECS/EKS
- Lambda Functions

EXPERIENCE

Mid-Level Backend Engineer, Trevi (Remote)

Cairo, Egypt *October 2024 – Present*

- Architected and developed backend solutions for wallet and loyalty applications using **NestJS**, **Prisma**, and **AWS**.
- Enhanced transaction systems by integrating cashback and promotion functionalities.
- Managed deployment and scalability through **AWS EC2**, **Lambda**, and **S3 Buckets**.

Intern, Vodafone Intelligent Solutions (VOIS)

Cairo, Egypt *February 2025 – Present*

- Contributed to developing the Serie Order Dispatching Tool, leveraging **ASP.NET Web API**, **Angular**, and an **N-Tier Architecture**.
- Delivered feature enhancements, implemented advanced filtering, and addressed critical bug fixes.
- Conducted comprehensive code reviews, mentoring team members to ensure code quality.
- Presented project updates and enhancements to stakeholders, ensuring alignment with customer requirements and satisfaction.

Software Engineer, MM Solutions (Remote)

Loveland, CO, USA *July 2024 – March 2025*

- Led website integration projects, significantly enhancing UI performance and user experience.
- Coordinated closely with Amazon Freight partners, optimizing dispatch efficiency.
- Improved website responsiveness and overall usability through targeted optimizations.

Full Stack Developer, Kinetics Egypt (On-site)

Cairo, Egypt *August 2024 – October 2024*

- Developed and maintained scalable client solutions using **AWS EC2**, **AWS CLI**, and **S3**.
- Collaborated with teams to design and deliver customized client-focused software solutions.
- Ensured seamless deployment and efficient infrastructure management.

Full Stack Developer (Freelance), Fiverr

Remote May 2023 – Oct 2023

- Designed and shipped custom web applications for international clients, delivering high-performance, user-friendly interfaces.
- Built Python-based stock-prediction dashboards (Robinhood data) to visualize and forecast market trends.
- Created interactive 2D games in Java and C++, tailoring gameplay mechanics to client requirements.
- Managed end-to-end freelance engagements on Fiverr, coordinating scope, timelines and releases while maintaining clear remote communication.

Full Stack Developer, Instatus

Cairo, Egypt *July 2022 – September 2022*

- Developed frontend and backend solutions using **TypeScript** and **Next.js**, improving software performance and reliability.
- Worked in cross-functional teams to ensure optimal software delivery.

PROJECTS

ECS-Help Desk Project *MERN Stack, Monolithic, Team Leader*
ecs-project-omega.vercel.app

- Led the development of a dynamic help desk system, improving response times and user satisfaction.
- Utilized **Tailwind CSS** for styling, enhancing the visual appeal and user experience.

Cairo Metro Reservation System *Monolithic, Developer*

- Built a responsive frontend using **Bootstrap**, ensuring accessibility across devices.
- Streamlined booking and payment operations with **Node.js** and **Express.js**.

E-commerce Website for Plastic Pallets *Microservices, Team Leader*

- Developed a scalable e-commerce platform using **NestJS** and **Next.js**, enabling seamless B2B transactions.
- Ensured efficient communication between microservices using **Kafka**.

Bookstore Application *AWS Services, Developer*

- Created a serverless bookstore application using **AWS Lambda**, **S3**, and **DynamoDB**.
- Ensured high availability and scalability through cloud infrastructure.

Deep Learning Project *Developer*

- Designed and implemented image and sequence recognition models using **TensorFlow** and **Keras**.
- Achieved high accuracy rates through effective algorithm optimization.

Task Tian *GraphQL, Prisma, Developer*

- Developed a task management web app using **GraphQL**, **Prisma**, and **Next.js**.
- Enhanced productivity by implementing features for task prioritization and categorization.

Exam Reservation System *MERN Stack, Team Leader*

- Built a global exam reservation system with robust authentication and real-time updates.

Clash of Clans 2D Game *Java, Developer*

- Developed a 2D game using **Java Swing**, incorporating OOP concepts and engaging gameplay mechanics.

Super Mario Game *C++, Developer*

- Designed and implemented game logic and rendering using **C++**, focusing on OOP principles.

E-commerce Mobile App *Flutter, Developer*

- Developed a mobile app for selling mobile phones online using **Flutter**.
- Integrated **Google Cloud**, **Firebase**, and **Firestore** for backend services.

Bachelor Portal *SQL, Developer*

- Designed a bachelor portal using SQL procedures, ensuring data integrity and optimizing query performance.

Operating System Project *Java, Developer*

- Implemented thread management and synchronization mechanisms for a concurrency-based project.

SOFT SKILLS

- **Problem Solving:** Strong analytical skills with the ability to diagnose issues and implement effective solutions.
- **Leadership:** Proven experience leading teams and managing projects in dynamic and fast-paced environments.
- **Collaboration:** Demonstrated ability to work effectively within cross-functional teams, fostering a collaborative and positive work culture.
- **Communication:** Excellent verbal and written communication skills, with the ability to convey complex concepts clearly to both technical and non-technical audiences.
- **Adaptability:** Highly adaptable to new technologies, tools, and environments, maintaining performance in diverse settings.
- **Time Management:** Adept at managing multiple priorities simultaneously, ensuring timely delivery of projects while maintaining high standards of quality.
- **Critical Thinking:** Skilled at applying critical thinking to analyze complex challenges and develop innovative, practical solutions.
- **Creativity:** Demonstrates a creative approach to problem-solving, generating novel solutions that enhance productivity and outcomes.
- **Attention to Detail:** Strong attention to detail, ensuring the accuracy and quality of work while minimizing errors.
